HANDICAPPING FOR TEAM (TENTATIVE)

LEAGUE SCORING MAY BE SUBJECT TO CHANGE FOR FALL LEAGUE!

- o Week 1 - 3 are play-in weeks to establish handicap and total strokes.
- o After Week 3, Teams will be placed in 3 Divisions based off Total Team Strokes.
- o Week 4 – 10 player's scores will be adjusted by handicap and combined for a Team Net Score.
- o To combat "Sandbagging" Scores will be adjusted by a maximum amount of 4.
- o Scratch players (Par or Better) stay at +1 handicap even if they shoot -2 or better. Your handicap would adjust once you shoot worse than Par.
- o After adjusting your handicap, to avoid decimals- Stix League rounds down if you shoot under your current week handicap and we round up when you shoot over your current week handicap. Substitutes scores only count if they shoot better than the absent player's handicap.

HANDICAP EXAMPLE PAR 36

Weeks 1-3 Handicap: 4

Week 4: I shoot 44 and Par is 36. I went +8.

- o Add your Current Handicap to the Week 4 score and then divide by 2.
- o 4 (Current Handicap) + 8 (Week 4 score) / $2 = 6$
- o Your new handicap is **6**.
- o Take your current week score **44** minus your handicap **6**.
- o $44 - 6 = 38$ (Net Score)

You went +2, and your handicap is now 6 going into Week 5. Add your score with your partner's score and the trend continues.
